XII. Examination of the physical nature and technical attributes of the geostationary orbit and its utilization and applications, including in the field of space communications, as well as other questions relating to developments in space communications, taking particular account of the needs and interests of developing countries, without prejudice to the role of the International Telecommunication Union 15

XIII. Dark and quiet skies, astronomy and large constellations: addressing emerging issues and challenges 15

XIV. Draft provisional agenda for the sixty-fourth session of the Scientific and Technical Subcommittee 16

Annexes

I. Report of the Working Group of the Whole 17

II. Report of the Working Group on the Long-term Sustainability of Outer Space Activities 19

III. Report of the Working Group on the Use of Nuclear Power Sources in Outer Space 25

IV. Report of the Action Team on Lunar Activities Consultation 27

Note on the report

1. The present report of the Scientific and Technical Subcommittee of the Committee on the Peaceful Uses of Outer Space does not set a precedent for the format, scope or content of future reports. This report is issued without prejudice to the mandate of the Committee and its subcommittees deriving from General Assembly resolutions 1348 (XIII) and 1472 (XIV) and relevant Assembly resolutions, as well as without prejudice to the substantive positions of member States. A comprehensive record of views expressed at the sixty-third session of the Subcommittee is available on the official website of the Office for Outer Space Affairs, and the full text of statements delivered by delegations during the session and voluntarily submitted for publication will be made available in document A/AC.105/1349.

I. Introduction

2. The Subcommittee held its sixty-third session at the United Nations Office at Vienna from 2 to 9 and 11 to 13 February 2026, with Pakorn Apaphant (Thailand) as Chair.

3. The Subcommittee held 18 meetings.

A. Attendance

4. Representatives of the following 93 States members of the Committee attended the session: Algeria, Angola, Argentina, Armenia, Australia, Austria, Azerbaijan, Bahrain, Belarus, Belgium, Brazil, Bulgaria, Burkina Faso, Canada, Chile, China, Colombia, Costa Rica, Cote d'Ivoire, Cuba, Cyprus, Czechia, Denmark, Dominican Republic, Ecuador, Egypt, El Salvador, Finland, France, Gambia, Germany, Ghana, Greece, Guatemala, Hungary, India, Indonesia, Iran (Islamic Republic of), Iraq, Israel, Italy, Japan, Jordan, Kazakhstan, Kenya, Kuwait, Latvia, Libya, Luxembourg, Malaysia, Maldives, Malta, Mexico, Mongolia, Morocco, Netherlands (Kingdom of the), New Zealand, Nicaragua, Nigeria, Norway, Oman, Pakistan, Panama, Paraguay, Peru, Philippines, Poland, Portugal, Qatar, Republic of Korea, Romania, Russian Federation, Saudi Arabia, Singapore, Slovakia, Slovenia, South Africa, Spain, Sri Lanka, Sudan, Sweden, Switzerland, Thailand, Tunisia, Türkiye, Ukraine, United Arab Emirates, United Kingdom of Great Britain and Northern Ireland, United States of America, Uruguay, Venezuela (Bolivarian Republic of), Viet Nam and Zimbabwe.

5. At its 1035th meeting, on 2 February 2026, the Subcommittee decided to invite the observer for Uganda, at its request, to attend the session and to address it, as appropriate, on the understanding that it would be without prejudice to further requests of that nature and that doing so would not involve any decision of the Committee concerning status.

6. At the same meeting, the Subcommittee decided to invite the observer for the Holy See, at its request, to attend the session and to address it, as appropriate, on the understanding that it would be without prejudice to further requests of that nature and that doing so would not involve any decision of the Committee concerning status.

7. Also at the same meeting, the Subcommittee decided to invite the observers for the League of Arab States and the Sovereign Order of Malta, at their request, to attend the session and to address it, as appropriate, on the understanding that it would be without prejudice to further requests of that nature and that doing so would not involve any decision of the Committee concerning status.

8. Observers for the Economic and Social Commission for Asia and the Pacific, the International Atomic Energy Agency, the International Civil Aviation Organization, the International Telecommunication Union (ITU), the United Nations Environment Programme, the United Nations Office for Disarmament Affairs and the World Meteorological Organization (WMO) attended the session.

9. The session was attended by representatives of the European Union, in its capacity as permanent observer of the Committee and in accordance with General Assembly resolutions 65/276 and 73/91.

10. The session was attended by observers for the following intergovernmental organizations having permanent observer status with the Committee: Asia-Pacific Space Cooperation Organization (APSCO), European Organization for Astronomical Research in the Southern Hemisphere (ESO), European Space Agency (ESA), European Telecommunications Satellite Organization, International Organization of Space Communications and Square Kilometre Array Observatory (SKAO).

11. The session was attended by observers for the International Asteroid Warning Network (IAWN) and the Space Mission Planning Advisory Group (SMPAG), in accordance with the agreement of the Subcommittee at its fifty-third session (A/AC.105/1109, para. 182), and by the observer for the Space and Global Health Network in accordance with the agreement of the Subcommittee at its sixtieth session (A/AC.105/1279, para. 238).

12. The session was attended by observers for the following non-governmental organizations having permanent observer status with the Committee: African Astronomical Society, Association of Space Explorers (ASE), CANEUS International, Committee on Space Research (COSPAR), European Astronomical Society (EAS), European Space Policy Institute, For All Moonkind, Global Satellite Operators Association, International Academy of Astronautics (IAA), International Astronautical Federation, International Astronomical Union (IAU), International Organization for Standardization, International Society for Photogrammetry and Remote Sensing (ISPRS), Lunar Policy Platform Foundation, Moon Village Association, National Space Society (NSS), Outer Space Institute (OSI), Prince Sultan Bin Abdulaziz International Prize for Water, Scientific Committee on Solar-Terrestrial Physics (SCOSTEP), Secure World Foundation (SWF), Space Generation Advisory Council, Space Renaissance International (SRI), Three Country – Trusted Broker, University Space Engineering Consortium-Global (UNISEC-Global), Women in Aerospace Europe and World Space Week Association.

13. At its 1035th meeting, the Subcommittee decided to invite the observers for the AstroAid Foundation and the Centre for Humanitarian Dialogue, at their request, to attend the session and to address it, as appropriate, on the understanding that it would be without prejudice to further requests of that nature and that doing so would not involve any decision of the Committee concerning status.

14. A list of the representatives of States, United Nations entities and other international organizations attending the session is contained in document A/AC.105/C.1/2026/INF/55.

15. The Subcommittee was informed of the nomination for the office of Chair of the Legal Subcommittee for the term 2028–2029 (A/AC.105/C.1/2026/CRP.4).

16. The Subcommittee was informed by the secretariat of the application for permanent observer status with the Committee submitted by the Chilean Space Association (A/AC.105/C.1/2026/CRP.7), the Space Debris Foundation (A/AC.105/C.1/2026/CRP.8) and the Karman Project (A/AC.105/C.1/2026/CRP.11), which were to be considered by the Committee at its sixty-ninth session, in 2026.

B. Adoption of the agenda

17. At its 1035th meeting, the Subcommittee adopted the following agenda:

1. Adoption of the agenda.
2. Election of the Chair.
3. Statement by the Chair.

4. General exchange of views and introduction of reports submitted on national activities.

5. Space for sustainable development: technology and its applications, including the United Nations Programme on Space Applications.

6. Space debris.

7. Space-system-based disaster management support.

8. Recent developments in global navigation satellite systems.

9. Space weather.

10. Near-Earth objects.

11. Long-term sustainability of outer space activities.

12. Future role and method of work of the Committee.

13. Space and global health.

14. Use of nuclear power sources in outer space.

15. Examination of the physical nature and technical attributes of the geostationary orbit and its utilization and applications, including in the field of space communications, as well as other questions relating to developments in space communications, taking particular account of the needs and interests of developing countries, without prejudice to the role of the International Telecommunication Union.

16. Dark and quiet skies, astronomy and large constellations: addressing emerging issues and challenges.

17. Draft provisional agenda for the sixty-fourth session of the Scientific and Technical Subcommittee.

18. Report to the Committee on the Peaceful Uses of Outer Space.

C. Election of the Chair

18. At its 1035th meeting, the Subcommittee elected Pakorn Apaphant (Thailand) as Chair for the year 2026, and Yaqoob Alqassab (Bahrain) as Chair for the year 2027, pursuant to General Assembly resolution 80/76.

D. General statements

19. Statements were made by representatives of the following member States during the general exchange of views: Algeria, Argentina, Armenia, Australia, Austria, Bahrain, Belarus, Belgium, Brazil, Bulgaria, Canada, Chile, China, Colombia, Costa Rica, Côte d'Ivoire, Cuba, Dominican Republic, Ecuador, Egypt, Finland, France, Germany, Ghana, Greece, Guatemala, India, Indonesia, Iran (Islamic Republic of), Iraq, Israel, Italy, Japan, Kenya, Luxembourg, Malaysia, Maldives, Malta, Mexico, Morocco, New Zealand, Nigeria, Norway, Pakistan, Panama, Paraguay, Peru, Philippines, Poland, Portugal, Republic of Korea, Romania, Russian Federation, Saudi Arabia, Singapore, Slovenia, South Africa, Spain, Sudan, Sweden, Switzerland, Thailand, Türkiye, Ukraine, United Arab Emirates, United Kingdom and United States. Statements were made by the representative of Ghana on behalf of the Group of African States and by the representative of India on behalf of the Group of 77 and China. The representative of the European Union, in its capacity as permanent observer, made a statement on behalf of the European Union and its member States. Additional statements were made by the observers for APSCO, ASE, COSPAR, the Economic and Social Commission for Asia and the Pacific, ESA, For All Moonkind, IAA, the International Astronautical Federation, the Lunar Policy Platform Foundation, the Moon Village Association, NSS, the Prince Sultan bin Abdulaziz

International Prize for Water, the Space Generation Advisory Council, SWF, Three Country – Trusted Broker, UNISEC-Global, Women in Aerospace Europe and World Space Week Association. A statement was also made by the observer for the Centre for Humanitarian Dialogue, an organization that had been invited to attend the session as an observer.

20. The Subcommittee had before it the following:

(a) Conference room paper submitted by the Moon Village Association containing reports on the activities in 2025 and plans of the Global Expert Group on Sustainable Lunar Activities, on International Moon Day 2025 and the outlook for 2026 and on activities relating to sites of special scientific interest (A/AC.105/C.1/2026/CRP.9);

(b) Conference room paper submitted by Canada, Germany and the United Arab Emirates containing an update on the work of the signatories to the Artemis Accords on the Principles for Cooperation in the Civil Exploration and Use of the Moon, Mars, Comets, and Asteroids for Peaceful Purposes (A/AC.105/C.1/2026/CRP.19).

21. The Subcommittee heard the following scientific and technical presentations:

(a) “China planetary exploration programme: Tianwen-2 mission”, by the representative of China;

(b) “Space traffic management: challenges, practices and opportunities for international cooperation”, by the representative of China;

(c) “Italian Space Agency space situational awareness activities: near-Earth object and Flyeye programme”, by the representative of Italy;

(d) “The world’s first mid-technical readiness level innovation acceleration and skilling institute for space: CANEUS/government of Maharashtra, India, partnership”, by the observer for CANEUS International;

(e) “The importance of lunar interoperability and related Moon Village Association/Global Expert Group on Sustainable Lunar Activities activities: status/outlook”, by the observer for the Moon Village Association.

22. The following events were held on the margins of the sixty-third session of the Subcommittee:

(a) “The role of Europe in international space cooperation”, co-organized by France and the European Space Policy Institute;

(b) “Lunar debris and disposal: what is the issue and why does it matter?”, co-organized by Germany, Japan, the Republic of Korea, the United Kingdom and the United States;

(c) “The Committee on the Peaceful Uses of Outer Space 2026–2027: Italian presidency programme presentation: targets and sharings”, organized by Italy;

(d) “Livestreaming of KiboCUBE satellite deployment from the International Space Station”, co-organized by Japan, Mexico and the Office for Outer Space Affairs;

(e) “Shaping the future of international norms for space debris: a collaborative approach”, co-organized by Japan and the Office for Outer Space Affairs;

(f) “The Space4Ocean Alliance”, co-organized by the Maldives Space Research Organization and the Office for Outer Space Affairs;

(g) “‘Freedom250’: American leadership in space meet-and-greet with the United States astronaut Stephen Bowen”, organized by the United States;

(h) “Friends of Sites of Special Scientific Interest on the Moon”, co-organized by COSPAR, IAA, IAU and the Moon Village Association;

(i) “Safeguarding space: environmental issues, risks and responsibilities”, co-organized by the United Nations Environment Programme and the Office for Outer Space Affairs;

(j) “Dark and quiet skies: from science to policy”, organized by the Office for Outer Space Affairs;

(k) “Ensuring responsible artificial intelligence in space and Earth observation: from principles to practice”, organized by the Office for Outer Space Affairs;

(l) “Expanding human access to space with Vast’s Haven-1 international consortium”, organized by the Office for Outer Space Affairs;

(m) “Harnessing Japan’s digital twin and artificial intelligence technologies and open data in disaster management”, organized by the Office for Outer Space Affairs;

(n) “Promoting the airspace integration of space activities”, organized by the Office for Outer Space Affairs.

E. National reports

23. The Subcommittee took note with appreciation of the reports by Member States (see A/AC.105/1367, A/AC.105/1367/Add.1, A/AC.105/1367/Add.2 and A/AC.105/1367/Add.3) and the conference room papers (A/AC.105/C.1/2026/CRP.2, A/AC.105/C.1/2026/CRP.3 and A/AC.105/C.1/2026/CRP.13) submitted for its consideration under agenda item 4, entitled “General exchange of views and introduction of reports submitted on national activities”. The Subcommittee recommended that the secretariat continue to invite Member States to submit annual reports on their space activities.

F. Symposium

24. On 10 February 2026, in accordance with the agreement reached by the Subcommittee at its forty-fourth session, in 2007 (A/AC.105/890, annex I, para. 24), and as agreed by the Subcommittee at its sixty-second session, in 2025 (A/AC.105/1338, para. 169), and endorsed by the Committee at its sixty-eighth session, in 2025 (A/80/20, para. 127), a symposium organized by the Office for Outer Space Affairs, opened by the Director of the Office and moderated by the Director and the Chief of the Space Applications Section of the Office was held, outside the session of the Subcommittee, on the topics “Long-term sustainability of outer space activities” and “Space solutions for sustainable development”.

G. Adoption of the report of the Scientific and Technical Subcommittee

25. After considering the items before it, the Subcommittee, at its 1052nd meeting, on 13 February 2026, adopted its report to the Committee on the Peaceful Uses of Outer Space.

II. Space for sustainable development: technology and its applications, including the United Nations Programme on Space Applications

26. In accordance with General Assembly resolution 80/76, the Subcommittee considered agenda item 5, entitled “Space for sustainable development: technology

and its applications, including the United Nations Programme on Space Applications".

27. The representatives of Belarus, Chile, China, Colombia, France, Ghana, India, Indonesia, Iran (Islamic Republic of), Italy, Japan, Malaysia, Nigeria, the Republic of Korea, the Russian Federation, Saudi Arabia, Slovenia, Thailand and the United Kingdom made statements under agenda item 5. A statement was made by the representative of Egypt on behalf of the Group of 77 and China. The representative of the European Union, in its capacity as permanent observer, made a statement on behalf of the European Union and its member States. Additional statements were made by the observers for APSCO and CANEUS International. During the general exchange of views, statements relating to the item were also made by representatives of other member States.

28. The Subcommittee heard the following scientific and technical presentations:

(a) "Making microgravity widely accessible to Earth industries for the benefit of humanity: a start-up's perspective", by the representatives of Austria;

(b) "Brazilian initiatives to advance space agriculture research and innovation for space exploration", by the representative of Brazil;

(c) "NISAR: dual frequencies – single purpose for a resilient Earth", by the representative of India;

(d) "Salient science outcome from Indian space science missions", by the representative of India;

(e) "Urban digital twins in Japan – project PLATEAU", by the representative of Japan;

(f) "An orbital perspective for planetary challenges: education, innovation and impact", by the representative of Japan;

(g) "Current status and development of the space situational awareness system in Kazakhstan", by the representative of Kazakhstan;

(h) "Green sustainable space propulsion", by the representative of Poland;

(i) "Space-based Earth observation, geo artificial intelligence and open data for sustainable development and disaster risk reduction in Tunisia", by the representative of Tunisia;

(j) "Space habitat and vehicle design, humanist requirements: simulated gravity, more redundancy of life-supporting systems, full protection from the Sun and cosmic radiation", by the observer for SRI.

29. In accordance with paragraph 10 of General Assembly resolution 80/76, the Working Group of the Whole was reconvened, with Prakash Chauhan (India) as Chair.

30. At its 1049th meeting, on 12 February 2026, the Subcommittee endorsed the report of the Working Group of the Whole, which is contained in annex I to the present report.

III. Space debris

31. In accordance with General Assembly resolution 80/76, the Subcommittee considered agenda item 6, entitled "Space debris".

32. The representatives of Belarus, Brazil, China, Colombia, France, Germany, India, Indonesia, Iran (Islamic Republic of), Italy, Japan, Pakistan, Panama, the Republic of Korea, the Russian Federation, Saudi Arabia, Slovakia, Thailand, the United Kingdom and the United States made statements under agenda item 6. A statement was also made by the representative of India on behalf of the Group of 77 and China. During the general exchange of views, statements relating to the item were

made by representatives of other member States. In addition, a statement was made by the observer for APSCO.

33. The Subcommittee had before it the following:

(a) Notes by the Secretariat on research on space debris, the safety of space objects with nuclear power sources on board and problems relating to the collision of such objects with space debris, containing replies received from Member States and international organizations (A/AC.105/C.1/132 and A/AC.105/C.1/2026/CRP.5);

(b) Conference room paper containing the report of the Inter-Agency Space Debris Coordination Committee on the status of the space debris environment (A/AC.105/C.1/2026/CRP.10);

(c) Conference room paper containing recommendations by NSS for sustainable orbital debris management (A/AC.105/C.1/2026/CRP.23).

34. The Subcommittee heard the following scientific and technical presentations:

(a) “SpaceTeamSat1: a CubeSat for the next generation”, by the representative of Austria;

(b) “Space launch in Brazil: the first commercial rocket launch from the Alcântara Launch Centre”, by the representative of Brazil;

(c) “2025 Centre national d’études spatiales space debris activities highlights”, by the representative of France;

(d) “A new approach for fragmentation modelling on the way to a European spacecraft break-up model”, by the representative of Germany;

(e) “The progress of the study on coordination items for international on-orbit servicing”, by the representative of Japan;

(f) “Timeline and remaining steps for space sustainability”, by the representative of Japan;

(g) “Near-Earth space observation activities of Ukraine in 2025”, by the representative of Ukraine;

(h) “The Inter-Agency Space Debris Coordination Committee: role, organization and outlook”, by the representative of the United Kingdom;

(i) “United States space debris environment and activity updates”, by the representative of the United States;

(j) “APSCO vision for space safety: ground-based optical observations”, by the observer for APSCO;

(k) “International standards development activities supporting orbital debris mitigation and sustainability”, by the observer for the International Organization for Standardization.

IV. Space-system-based disaster management support

35. In accordance with General Assembly resolution 80/76, the Subcommittee considered agenda item 7, entitled “Space-system-based disaster management support”.

36. The representatives of Argentina, Belarus, Brazil, China, Colombia, France, Germany, Ghana, India, Indonesia, Italy, Japan, Luxembourg, Nigeria, Pakistan, the Philippines, the Republic of Korea, the Russian Federation, Slovenia, South Africa, Spain, Thailand, the United Arab Emirates and the United Kingdom made statements under agenda item 7. The representative of the European Union, in its capacity as permanent observer, made a statement on behalf of the European Union and its member States. The observer for APSCO also made a statement. During the general

exchange of views, statements relating to the item were made by representatives of other member States.

37. The Subcommittee had before it the report on activities carried out in 2025 in the framework of the United Nations Platform for Space-based Information for Disaster Management and Emergency Response (A/AC.105/1347).

38. The Subcommittee heard the following scientific and technical presentations:

(a) "Disaster risk management support using satellite data and artificial intelligence-driven digital twins through collaboration between the Commonwealth and the Office for Outer Space Affairs", by the representative of Japan;

(b) "Leveraging Earth observation and artificial intelligence for scalable climate risk management", by the representative of Luxembourg;

(c) "The role of Earth observation data in the disaster risk management cycle", by the representative of Luxembourg;

(d) "RISE: remote imaging support for emergencies – empowering humanitarians with faster, cost-effective geospatial intelligence", by the representative of Luxembourg;

(e) "Satellite communications for sustainable development and disaster management", by the representative of Luxembourg;

(f) "Leveraging space data for disaster risk reduction in the Philippines", by the representative of the Philippines;

(g) "Satellite-based services for disaster risk management in Slovenia: Slovenia-European Union Agency for the Space Programme-Eurisy joint event in September 2025", by the representative of Slovenia;

(h) "In-situ probe diagnostics of the ionospheric plasma for a short-term prediction on earthquakes incipient on the satellite ground track", by the representative of Ukraine;

(i) "Artificial intelligence-powered geospatial tools for flood risk mapping and its innovative applications", by the observer for the Economic and Social Commission for Asia and the Pacific;

(j) "APSCO cooperation: cooperative supports for data-sharing, disaster response and early warning", by the observer for APSCO;

(k) "Scientific results of ISPRS in space-system-based disaster management support", by the observer for ISPRS.

V. Recent developments in global navigation satellite systems

39. In accordance with General Assembly resolution 80/76, the Subcommittee considered agenda item 8, entitled "Recent developments in global navigation satellite systems", and reviewed matters related to the International Committee on Global Navigation Satellite Systems (ICG).

40. The representatives of China, France, India, Indonesia, Italy, Japan, Pakistan, the Russian Federation and the United States made statements under agenda item 8. A statement was also made by the representative of the Republic of Korea, in that country's capacity as Chair of the nineteenth meeting of ICG. During the general exchange of views, statements relating to the item were made by representatives of other member States.

41. The Subcommittee had before it the following:

(a) Note by the Secretariat containing the report on the nineteenth meeting of ICG (A/AC.105/1368);

(b) Report of the Secretariat on activities carried out in 2025 in the framework of the workplan of ICG (A/AC.105/1369);

(c) Report on the United Nations/Indonesia workshop on the applications of global navigation satellite systems (A/AC.105/1371).

42. The Subcommittee heard the following scientific and technical presentations:

(a) "Brazil's positioning, navigation and timing programme: technological development, strategic priorities and applications", by the representative of Brazil;

(b) "Maritime communication, navigation and surveillance systems with short-wave infrared-based star tracker and cloud adaptation", by the representative of Italy.

VI. Space weather

43. In accordance with General Assembly resolution 80/76, the Subcommittee considered agenda item 9, entitled "Space weather".

44. The representatives of Brazil, China, Ecuador, Egypt, France, India, Iran (Islamic Republic of), Italy, Japan, Mexico, the Republic of Korea, Saudi Arabia, South Africa, Thailand, the United Kingdom and the United States made statements under agenda item 9. The observer for WMO made a statement on behalf of COSPAR, the International Space Environment Service and WMO. The observer for COSPAR also made a statement. During the general exchange of views, statements relating to the item were made by representatives of other member States.

45. The Subcommittee had before it the following:

(a) Report on the United Nations/Nigeria workshop on the International Space Weather Initiative: Space Weather during a Moderate Solar Cycle (A/AC.105/1370);

(b) Conference room paper on the COSPAR Heliophysics Guidelines (A/AC.105/C.1/2026/CRP.15).

46. The Subcommittee heard the following scientific and technical presentations:

(a) "Update of Japanese activities for operational space weather services", by the representative of Japan;

(b) "National preparedness of the Republic of Korea for the space weather risk", by the representative of the Republic of Korea;

(c) "Building sustainable space weather research and operations in the Philippines: recent developments and future directions", by the representative of the Philippines;

(d) "Updates of the activities of SCOSTEP", by the observer for SCOSTEP.

VII. Near-Earth objects

47. In accordance with General Assembly resolution 80/76, the Subcommittee considered agenda item 10, entitled "Near-Earth objects".

48. The representatives of Canada, China, France, Germany, Iran (Islamic Republic of), Italy, Japan, the Republic of Korea, the Russian Federation, the United Kingdom and the United States made statements under agenda item 10. Statements were also made by the observers for IAWN and SMPAG. During the general exchange of views, statements relating to the item were made by representatives of other member States.

49. The Subcommittee heard the following scientific and technical presentations:

(a) "How IAWN resolved the Earth impact threat from asteroid 2024 YR4", by the observer for IAWN;

(b) “Exercising the response to an asteroid impact threat via SMPAG”, by the observer for SMPAG.

VIII. Long-term sustainability of outer space activities

50. In accordance with General Assembly resolution 80/76, the Subcommittee considered agenda item 11, entitled “Long-term sustainability of outer space activities”.

51. The representatives of Argentina, Australia, Brazil, Canada, Chile, China, France, Germany, India, Indonesia, Iran (Islamic Republic of), Italy, Japan, Mexico, New Zealand, Panama, the Philippines, the Republic of Korea, the Russian Federation, Saudi Arabia, Slovenia, South Africa, Spain, the United Arab Emirates, the United Kingdom and the United States made statements under agenda item 11. Statements were also made by the observers for ESA, For All Moonkind, OSI and SWF. During the general exchange of views, statements relating to the item were made by representatives of other member States.

52. The Subcommittee had before it the following:

(a) Report of the Working Group on the Long-term Sustainability of Outer Space Activities (A/AC.105/C.1/133);

(b) Note by the Secretariat on the long-term sustainability of outer space activities containing submissions received from Germany, Singapore, CANEUS International, IAU, ITU and UNISEC-Global (A/AC.105/1361/Add.1);

(c) Conference room paper containing a note by the Secretariat on space situational awareness realities, containing contributions from Algeria, Bahrain, Brazil, France, Germany, Kuwait, the Philippines, Singapore, Spain, Türkiye, the United Kingdom, the United States, AeroAI Global Solutions, the Global Satellite Operators Association and SWF (A/AC.105/C.1/2026/CRP.6);

(d) Conference room paper submitted by ASE containing astronaut-informed perspectives on space traffic management and orbital debris: findings and recommendations of ASE (A/AC.105/C.1/2026/CRP.12);

(e) Conference room paper submitted by Three Country – Trusted Broker on a polycentric, adaptive governance mechanism for cooperative remediation of massive derelicts: a functional interface between parallel space governance frameworks (A/AC.105/C.1/2026/CRP.14);

(f) Conference room paper submitted by the Islamic Republic of Iran on a framework for the long-term sustainability of outer space: a call for collective responsibility and equitable access (A/AC.105/C.1/2026/CRP.21);

(g) Conference room paper submitted by the United Kingdom containing an update on its reporting approach for the voluntary implementation of the Guidelines for the Long-term Sustainability of Outer Space Activities (A/AC.105/C.1/2026/CRP.26);

(h) Non-paper by the Chair of the Working Group on the Long-term Sustainability of Outer Space Activities containing an updated draft of a new/extended workplan;

(i) Non-paper by the Islamic Republic of Iran containing views on the draft workplan proposed by the Chair of the Working Group on the Long-term Sustainability of Outer Space Activities;

(j) Non-paper by China containing a new multi-year workplan for consideration by the Working Group on the Long-term Sustainability of Outer Space Activities;

(k) Non-paper by the Chair of the Working Group on the Long-term Sustainability of Outer Space Activities containing a proposal on merging ideas for a new workplan extension.

53. The Subcommittee heard the following scientific and technical presentations:

(a) “Contributions of the Institutional Security Cabinet of the Office of the President of Brazil (Gabinete de Segurança Institucional da Presidência da República) to the long-term sustainability of space activities in the Brazilian context”, by the representative of Brazil;

(b) “Building a sustainable space future: capacity development, education and gender inclusion”, by the representative of Brazil;

(c) “Engineering practice of reusable rocket technology in China: case study of Landspace ZhuQue-3 maiden flight”, by the representative of China;

(d) “Recent measurements of unintended electromagnetic radiation from large satellite constellations”, by the representative of Germany;

(e) “Spacetalk: the neutral platform for global space traffic coordination”, by the representative of Switzerland;

(f) “Lunar dust as a long-term sustainability challenge”, by the observer for For All Moonkind;

(g) “Long-term sustainability of outer space: IAA contributions”, by the observer for IAA;

(h) “The CRASH Clock: a key environmental indicator for assessing operational stress on orbit”, by the observer for OSI;

(i) “Living and working in free space: a choice of freedom!”, by the observer for SRI;

(j) “Promoting long-term sustainability through education and responsible nano/micro satellite operations”, by the observer for UNISEC-Global.

54. In accordance with General Assembly resolution 80/76, the Working Group on the Long-term Sustainability of Outer Space Activities was reconvened at the present session, with Umamaheswaran R. (India) as Chair. In addition, its Expert Group on Space Situational Awareness was convened, with Fatima Salem Al Shamsi (United Arab Emirates) as Chair.

55. At its 1049th meeting, the Subcommittee endorsed the thorough report of the Working Group on the Long-term Sustainability of Outer Space Activities contained in document A/AC.105/C.1/133 as the output of the Working Group under the multi-year workplan for the period 2022–2026 (A/AC.105/1258, annex II, appendix, para. 18) and, following the recommendation of the Working Group (A/80/20, para. 108), extended the Working Group with the current Chair, Umamaheswaran R. (India), remaining as such.

56. At the same meeting, the Subcommittee endorsed the report of the Working Group on the Long-term Sustainability of Outer Space Activities at the present session, which is contained in annex II to the present report.

IX. Future role and method of work of the Committee

57. In accordance with General Assembly resolution 80/76, the Subcommittee considered agenda item 12, entitled “Future role and method of work of the Committee”.

58. The representatives of Canada, China, France, Iran (Islamic Republic of), New Zealand, the Republic of Korea, the Russian Federation, the United Kingdom and the United States made statements under agenda item 12. A statement was also made by the representative of Nigeria on behalf of the Group of African States. The Chair of

the Working Group on Legal Aspects of Space Resource Activities of the Legal Subcommittee made a statement. A statement was also made by the representative of Pakistan on behalf of the Co-Chairs of the Action Team on Lunar Activities Consultation. During the general exchange of views, statements relating to the item were made by representatives of other member States.

59. The Subcommittee had before it the following:

(a) Report of the Action Team on Lunar Activities Consultation at the sixty-third session of the Subcommittee (A/AC.105/C.1/L.425/Add.16);

(b) Conference room paper by the Chair of the Working Group of the Whole (A/AC.105/C.1/2026/CRP.27);

(c) Non-paper by the secretariat containing an overview of the Working Group of the Whole.

60. The Subcommittee heard a technical presentation entitled “Protecting astronomy on the Moon: interferometry and sites of special scientific interest”, by the observer for IAU.

61. The Subcommittee took note of the report of the Action Team on Lunar Activities Consultation, which is contained in annex IV to the present report.

X. Space and global health

62. In accordance with General Assembly resolution 80/76, the Subcommittee considered agenda item 13, entitled “Space and global health”.

63. The representatives of Argentina, Bahrain, China, Japan, Saudi Arabia, Thailand and the United Kingdom made statements under agenda item 13. A statement was also made on behalf of the Coordinator of the Space and Global Health Network. During the general exchange of views, statements relating to the item were made by representatives of other member States.

64. The Subcommittee had before it the following:

(a) Conference room paper containing the annual report of the Space and Global Health Network and the final draft of the space and global health curriculum (A/AC.105/C.1/2026/CRP.24);

(b) Conference room paper containing the report on the meetings of the Space and Global Health Network held on the margins of the sixty-third session of the Subcommittee (A/AC.105/C.1/2026/CRP.25).

65. The Subcommittee heard the following scientific and technical presentations:

(a) “Precision health monitoring with artificial intelligence and digital twins in Australia: knowledge translation from remote Australia to space and global health”, by the representative of Australia;

(b) “Space flight-impacted cellular gene expression changes and their implications for health”, by the representative of Saudi Arabia.

XI. Use of nuclear power sources in outer space

66. In accordance with General Assembly resolution 80/76, the Subcommittee considered agenda item 14, entitled “Use of nuclear power sources in outer space”.

67. The representatives of Argentina, Canada, Chile, China, France, Indonesia, Italy, the Russian Federation, the United Kingdom and the United States made statements under agenda item 14. A statement was also made by the observer for the Lunar Policy Platform Foundation. During the general exchange of views, statements relating to the item were made by representatives of other member States.

68. The Subcommittee had before it the following:

(a) Conference room paper submitted by ESA on a preliminary reflection on the safety guidelines for nuclear power source applications: beyond the Earth's biosphere for space missions in the continuation of the ESA nuclear launch safety authorization process (A/AC.105/C.1/2026/CRP.17);

(b) Conference room paper submitted by the Lunar Policy Platform Foundation on policy consultations on lunar nuclear reactors (A/AC.105/C.1/2026/CRP.18).

69. The Working Group on the Use of Nuclear Power Sources in Outer Space held three meetings. At its 1049th meeting, the Subcommittee endorsed the report of the Working Group, which is contained in annex III to the present report.

XII. Examination of the physical nature and technical attributes of the geostationary orbit and its utilization and applications, including in the field of space communications, as well as other questions relating to developments in space communications, taking particular account of the needs and interests of developing countries, without prejudice to the role of the International Telecommunication Union

70. In accordance with General Assembly resolution 80/76, the Subcommittee considered agenda item 15, entitled "Examination of the physical nature and technical attributes of the geostationary orbit and its utilization and applications, including in the field of space communications, as well as other questions relating to developments in space communications, taking particular account of the needs and interests of developing countries, without prejudice to the role of the International Telecommunication Union", as a single issue/item for discussion.

71. The representatives of China, India, Indonesia, Pakistan and the United Kingdom made statements under agenda item 15. The observer for ITU also made a statement. During the general exchange of views, statements relating to the item were made by representatives of other member States.

72. The Subcommittee had before it a conference room paper containing the report of ITU on the use of the geostationary orbit and other orbits (A/AC.105/C.1/2026/CRP.16).

XIII. Dark and quiet skies, astronomy and large constellations: addressing emerging issues and challenges

73. In accordance with General Assembly resolution 80/76, the Subcommittee considered agenda item 16, entitled "Dark and quiet skies, astronomy and large constellations: addressing emerging issues and challenges" as a single issue/item for discussion.

74. The representatives of Argentina, Australia, Austria, Brazil, Canada, Chile, China, Colombia, France, Germany, Indonesia, Iran (Islamic Republic of), Italy, Mexico, Pakistan, the Republic of Korea, the Russian Federation, Slovakia, South Africa, Spain, Thailand, the United Kingdom and the United States made statements under agenda item 16. The observers for the African Astronomical Society, EAS, ESO, IAU, NSS, OSI and SKAO also made statements under the item. During the general exchange of views, statements relating to the item were made by representatives of other member States.

75. The Subcommittee had before it the following:

(a) Report on the United Nations/SKAO Workshop on Dark and Quiet Skies for Science and Society 2025 (A/AC.105/1348);

(b) Conference room paper submitted by NSS on dark and quiet skies: considerations for astronomy, commercial space activity and a long-term human presence in space (A/AC.105/C.1/2026/CRP.20);

(c) Conference room paper submitted by Belgium, Brazil, Bulgaria, Chile, Colombia, France, Germany, Mexico, Spain, Switzerland, the United Kingdom, COSPAR, EAS, ESO, IAU, OSI and SKAO on the protection of dark and quiet skies for science and society (A/AC.105/C.1/2026/CRP.22/Rev.1).

76. The Subcommittee heard the following scientific and technical presentations:

(a) “Commercial space technologies, to enhance peace, or threaten global security?”, by the representative of the Islamic Republic of Iran;

(b) “Risks of megaconstellations for low Earth orbit space telescopes and Earth’s high atmosphere”, by the representative of Spain;

(c) “Low Earth orbit utilization: space science perspective”, by the representative of the Russian Federation;

(d) “Summary and reflections from the United Nations/SKAO Workshop on Dark and Quiet Skies”, by the observer for SKAO.

XIV. Draft provisional agenda for the sixty-fourth session of the Scientific and Technical Subcommittee

77. In accordance with General Assembly resolution 80/76, the Subcommittee considered agenda item 17, entitled “Draft provisional agenda for the sixty-fourth session of the Scientific and Technical Subcommittee”.

78. The Subcommittee was informed that the secretariat had proposed that its sixty-fourth session be held in the second half of February 2027, subject to informal consultations, with the final decision to be made by the Committee at its sixty-ninth session.

Annex I

Report of the Working Group of the Whole

1. In accordance with paragraph 10 of General Assembly resolution 80/76, the Scientific and Technical Subcommittee, at its sixty-third session, reconvened its Working Group of the Whole.

2. From 3 to 12 February 2026, the Working Group held five meetings, with Prakash Chauhan (India) as Chair and Imtiaz Ali Khan (India) as Acting Chair.

3. The Working Group considered the following items:

(a) Space for sustainable development: technology and its applications, including the United Nations Programme on Space Applications;

(b) Future role and method of work of the Committee;

(c) Draft provisional agenda for the sixty-fourth session of the Scientific and Technical Subcommittee.

4. The Working Group had before it the documents listed in paragraph 59 of the report of the Subcommittee on its sixty-third session.

5. The Working Group agreed that informal open-ended consultations among interested delegations would be held during the intersessional period, in March, April and May 2026, under the leadership of the Chair of the Working Group, to further discuss measures to address the effects of the liquidity crisis and to improve the organization and the work of the Committee on the Peaceful Uses of Outer Space and its subcommittees, guided by the rules of procedure of the General Assembly of the United Nations, as they applied to the Committee.

6. The Working Group noted that a non-exhaustive list of possible issues that could be addressed in the course of those informal consultations was contained in a conference room paper by the Chair of the Working Group (A/AC.105/C.1/2026/CRP.27).

7. The Working Group requested the secretariat to issue a circular to States members of the Committee containing an invitation to participate in the intersessional consultations, with an indication of the specific dates of those consultations, to nominate focal points and to identify priority topics for the initial round of consultations.

8. The Working Group agreed that it would meet during the sixty-ninth session of the Committee, to be held in 2026, with a view to finalizing the proposals for consideration by the Committee under the agenda item entitled “Future role and method of work of the Committee”. In that regard, the Working Group requested the secretariat to make the relevant arrangements for those meetings.

9. The Working Group heard interim reports on informal consultations of the Action Team on Lunar Activities Consultation, led by the Co-Chairs of the Action Team, Hasan Abbas (Pakistan) and Ulpia-Elena Botezatu (Romania).

10. The Working Group agreed that the agenda of the Subcommittee at its sixty-fourth session, to be held in 2027, would be considered by the Committee at its sixty-ninth session, taking into account the outcomes of the informal intersessional consultations of the Working Group.

11. The Working Group noted that, in the context of the Committee’s consideration of the agenda of the Subcommittee, should the Committee decide to hold a symposium during the sixty-fourth session of the Subcommittee, the symposium would be organized by the Committee on Space Research on the theme “Advancing sustainable lunar science and exploration”.

12. The Working Group recommended that the present report of the Working Group be brought to the attention of the Legal Subcommittee at its sixty-fifth session, to be

held in 2026, with a view to informing the Legal Subcommittee in its consideration of item 8 of its agenda for that session, entitled “Future role and method of work of the Committee”.

13. At its fifth meeting, on 12 February 2026, the Working Group adopted the present report.

Annex II

Report of the Working Group on the Long-term Sustainability of Outer Space Activities

1. In accordance with General Assembly resolution 80/76, the Scientific and Technical Subcommittee, at its sixty-third session, reconvened its Working Group on the Long-term Sustainability of Outer Space Activities.

2. The Working Group had before it the documents listed in paragraph 52 of the report of the Subcommittee on its sixty-third session.

3. The Working Group held meetings from 3 to 12 February 2026, with Umamaheswaran R. (India) as Chair.

4. The Working Group noted that, in addition to the formal meetings that it had held during the present session, it had also held extensive informal consultations on the margins of the session, as well as an intersessional informal online meeting on 8 and 9 October 2025.

5. The Working Group adopted the report of the Working Group on the Long-term Sustainability of Outer Space Activities contained in document A/AC.105/C.1/133 as the output under its multi-year workplan for the period 2022–2026 (A/AC.105/1258, annex II, appendix, para. 18).

6. The Working Group recalled its recommendation (A/80/20, para. 108) and confirmed that the existing Working Group would be extended, with the current Chair, Umamaheswaran R. (India), remaining as such.

7. The Working Group noted that extensive work had gone into drafting a new workplan and that such work would continue during the intersessional period, with a view to reaching consensus on the workplan at the sixty-ninth session of the Committee on the Peaceful Uses of Outer Space, to be held in 2026. In that connection, the Working Group requested the Chair of the Working Group to coordinate with the Chair of the Committee and with the secretariat to make arrangements for the Working Group to meet during the sixty-ninth session of the Committee, making use of available interpretation services.

Expert Group on Space Situational Awareness of the Working Group on the Long-term Sustainability of Outer Space Activities

8. The Working Group on the Long-term Sustainability of Outer Space Activities recalled that, at the sixty-eighth session of the Committee on the Peaceful Uses of Outer Space, it had decided to establish the Expert Group on Space Situational Awareness, with the mandate, terms of reference, methods of work and workplan as contained in the appendix to the present report of the Working Group, and had elected the United Arab Emirates to assume the position of Chair of the Expert Group (A/80/20, paras. 110 and 111).

9. The Working Group noted that the Expert Group had commenced its work during the intersessional period following the sixty-eighth session of the Committee, with Fatima Salem Al Shamsi of the United Arab Emirates serving as Chair. The Expert Group had held intersessional meetings on 26 November 2025 and 21 January 2026, and had also held meetings during the sixty-third session of the Scientific and Technical Subcommittee.

10. The Working Group noted that the Expert Group, as part of its initial phase of work and in accordance with its workplan, had begun collecting and exchanging information on existing space situational awareness practices and operational realities through oral briefings by member States, namely Algeria, Bahrain, Brazil, Canada, France, Germany, Indonesia, Japan, Norway, the Philippines, the Russian Federation, Singapore, Spain, Türkiye, the United Kingdom of Great Britain and Northern Ireland and the United States of America, on their respective space situational awareness

capabilities, operational practices and needs. The work of the Expert Group had also benefited from written submissions received from member States and organizations having permanent observer status with the Committee (A/AC.105/C.1/2026/CRP.6). Based on the information received, the Expert Group had begun its examination of existing frameworks and practices for space situational awareness.

11. The Working Group noted that, in view of the volume and technical complexity of the work, the Expert Group had agreed to hold additional intersessional meetings prior to the sixty-ninth session of the Committee, in order to continue collecting necessary information with a view to identifying elements that would be required for effective and timely coordination concerning space situational awareness.

12. On 12 February 2026, the Working Group considered and adopted the present report.

Appendix

Mandate, terms of reference, method of work and workplan for the Expert Group on Space Situational Awareness

1. At its sixty-eighth session, the Committee on the Peaceful Uses of Outer Space noted that the Working Group on the Long-term Sustainability of Outer Space Activities of the Scientific and Technical Subcommittee had decided to establish an expert group on space situational awareness, in accordance with the proposal submitted by the United Arab Emirates as contained in conference room paper A/AC.105/2025/CRP.27/Rev.4 (A/80/20, para. 110). The present annex contains an edited version of that text.

2. Also at its sixty-eighth session, the Committee noted that the Working Group had elected the United Arab Emirates to assume the position of Chair of the Expert Group on Space Situational Awareness (A/80/20, para. 111).

3. Through an official communication dated 1 October 2025 from the Office for Outer Space Affairs, States members of the Committee were informed that the Government of the United Arab Emirates had decided to nominate Fatima Salem Al Shamsi to chair the Expert Group on Space Situational Awareness.

I. Introduction and background

4. The increasing number of space actors and objects in orbit, combined with the growing complexity of space operations, has elevated space situational awareness and space traffic coordination to the level of critical priorities. Ensuring the safety and sustainability of space activities requires addressing several key areas, including information-sharing on space activities, operational coordination, interoperability between systems, safety measures, debris mitigation and remediation, and the protection of operational assets and critical infrastructure in orbit. These efforts are essential not only for safeguarding current space missions but also for ensuring the freedom of exploration and use of space for all States and for maintaining the long-term sustainability of orbital environments.

5. Space situational awareness capabilities play an essential role in ensuring safe and sustainable space operations and in mitigating the risks associated with the increased number of space objects. They thus support better global coordination of space traffic, which is necessary in order to make informed decisions and enhance operational safety for all space actors.

6. While there are ongoing national, regional and international efforts to address challenges relating to space situational awareness and space traffic coordination, no dedicated mechanism exists for discussing data formats and the coordination of global information-sharing on space situational awareness.

7. In the light of the above, the United Arab Emirates proposed the establishment of an expert group on space situational awareness with the objective of facilitating discussions to improve information-sharing and the development of best practices within the framework of the Scientific and Technical Subcommittee of the Committee on the Peaceful Uses of Outer Space.

8. The present annex outlines the mandate, terms of reference and method of work for the Expert Group. The aim is to support focused discussions at subsequent sessions of the Committee and to further advance a collaborative and effective global approach to space situational awareness.

9. The Expert Group on Space Situational Awareness will directly support States members of the Committee in advancing global coordination of and cooperation in space situational awareness. Its establishment under the Scientific and Technical Subcommittee ensures focused, actionable outcomes that will complement existing

international frameworks, including the Guidelines for the Long-term Sustainability of Outer Space Activities of the Committee, without administrative overlap. Regular reporting to the Subcommittee through the Working Group on the Long-term Sustainability of Outer Space Activities will ensure transparency, alignment and continuous monitoring of progress.

II. Mandate and terms of reference

10. The mandate of the Expert Group on Space Situational Awareness is:

(a) To promote and foster greater awareness of and cooperation in the exchange of relevant information on space objects and the operational environment (“space traffic information”) and information-sharing among Member States;

(b) To collect, compile and study existing measures and best practices and propose, as appropriate, new measures to achieve consistency in data formats and in the understanding and use of information-sharing practices on space situational awareness to aid operational coordination;

(c) To promote international cooperation and identify areas for future work, including capacity-building.

11. The Office for Outer Space Affairs shall invite all States members of the Committee interested in participating in the Expert Group to appoint a maximum of four experts. Representatives of organizations having permanent observer status with the Committee may be accorded access to meetings and may provide submissions to the Expert Group, but they shall not participate in formal decision-making.

12. The Expert Group may invite recognized technical, policy and legal experts from intergovernmental organizations, the private sector and other entities to attend its meetings on an ad hoc basis. The number of such external experts shall be limited to a maximum of five per meeting and be limited to one representative per entity.

13. Such external experts having received an invitation to participate may observe, speak or submit written contributions at formal and informal meetings of the Expert Group. Such submissions should be a maximum of five pages in length.

14. The Expert Group will provide focused inputs with the ultimate objective of creating a technical basis of understanding that can support actionable recommendations and voluntary standards aimed at enhancing global operational coordination of space situational awareness and safety in space activities, including, for example, the role of the United Nations in examining information-sharing on space situational awareness. A comprehensive final report will be presented with a view to informing a possible fourth United Nations Conference on the Exploration and Peaceful Uses of Outer Space (UNISPACE IV).

15. Discussions will be rigorously limited to those necessary for fulfilling the Group’s mandate, avoiding duplication with ongoing efforts within the Committee.

16. The work of the Expert Group shall complement and support ongoing consultations within the Committee, its subcommittees and their working groups. It will promote informal collaboration and exchange of information among existing space situational awareness frameworks or ongoing initiatives.

III. Method of work

17. The Expert Group has been established under the Working Group on the Long-term Sustainability of Outer Space Activities, and it shall work on the basis of consensus among the participating States members of the Committee.

18. The Expert Group will directly contribute to and complement the ongoing efforts and objectives of the Working Group on the Long-term Sustainability of Outer

Space Activities by fostering effective implementation of the relevant Guidelines for the Long-term Sustainability of Outer Space Activities.

19. The Expert Group shall meet as needed to advance its work, both on the margins of the sessions of the Committee and the Scientific and Technical Subcommittee and during intersessional periods. All meetings of the Expert Group will be organized in a hybrid format to allow for the inclusive participation of its members and maximize the use of time.

20. The Office for Outer Space Affairs shall facilitate the work of the Expert Group by providing support in convening and facilitating meetings.

21. Upon the establishment of the Expert Group, and at the proposal of States members, the Committee shall approve its Chair, and the Office for Outer Space Affairs shall appoint a secretary to support the work of the Expert Group. The United Arab Emirates expressed its readiness and willingness to act as Chair of the Expert Group and provide administrative support.

22. The scope of the Expert Group specifically covers topics addressed in section IV of the present proposal. The Expert Group may adjust the topics under discussion, as appropriate.

23. The Expert Group will provide – through the Working Group on the Long-term Sustainability of Outer Space Activities – updates on its progress to the Scientific and Technical Subcommittee under the agenda item on the long-term sustainability of outer space activities.

IV. Discussion topics on space situational awareness

24. The following topics are relevant to the objective of promoting greater awareness and cooperation:

(a) Enhanced global operational coordination of space situational awareness data systems and harmonization of data formats across global space situational awareness systems;

(b) Establishment of forums to enable regular communication and exchange of space situational awareness topics among Member States.

25. The following topics are relevant to the objective of reviewing existing measures and proposing new ones:

(a) Assessment of current information-sharing practices on international space situational awareness;

(b) Discussion of existing space situational awareness frameworks and the potential development of information-sharing platforms, for example, existing national or regional space situational awareness platforms or a unified platform, for example, under the auspices of the United Nations, in order to align and enhance coordination on space situational awareness among Member States;

(c) Establishment of unified global standards and formats for the exchange of information on space situational awareness.

26. The following topics are relevant to the objective of international cooperation and identification of areas for future work, including capacity-building:

(a) Operational coordination among satellite operators, including notification to enable collision avoidance manoeuvres;

(b) Knowledge-sharing activities between Member States;

(c) International cooperation on space situational awareness with a view to supporting capacity-building for Member States with emerging space programmes and capabilities;

(d) Policy recommendations;

(e) International information-sharing and coordinated approach for space situational awareness as a potential concrete outcome of events such as a possible fourth United Nations Conference on the Exploration and Peaceful Uses of Outer Space (UNISPACE IV).

V. Workplan for the period 2025–2028

Year	*Period*	*Aims and actions*	*Frequency of meetings*
2025	Intersessional	Start discussion	2
2026	Scientific and Technical Subcommittee session	Focus on technical aspects and begin developing draft recommendations	3
	Intersessional	Present initial recommendations for preliminary feedback	2
	Committee session	Present initial recommendations for preliminary feedback	3
	Intersessional	Further refine recommendations and prepare an interim report	2
2027	Scientific and Technical Subcommittee	Finalize recommendations	3
	Intersessional	Refine and consolidate recommendations	2
	Committee session	Present consolidated recommendations	3
	Intersessional	Address the feedback received from the Committee on the consolidated recommendations	2
2028	Scientific and Technical Subcommittee	Finalize outstanding recommendations across all objectives	6
	Intersessional		
	Committee session		

Annex III

Report of the Working Group on the Use of Nuclear Power Sources in Outer Space

1. In accordance with paragraph 10 of General Assembly resolution 80/76, the Scientific and Technical Subcommittee, at its 1035th meeting, on 2 February 2026, reconvened its Working Group on the Use of Nuclear Power Sources in Outer Space, with Leopold Summerer (Austria) as Chair.

2. The Working Group recalled the three main objectives under its five-year workplan, as contained in the report of the Subcommittee on its sixtieth session (A/AC.105/1279, annex III, paras. 8 and 9) and endorsed by the Committee on the Peaceful Uses of Outer Space at its sixty-sixth session (A/78/20, para. 150), and its yearly plan for the period 2024–2028 setting out the work to be carried out to achieve its objectives (A/AC.105/1307, annex III, para. 6).

3. The Working Group had before it the documents listed in paragraph 68 of the report of the Subcommittee on its sixty-third session.

4. The Working Group held informal and formal meetings during the sixty-third session of the Subcommittee in order to advance its work under the three core objectives, as referred to in paragraph 2 above.

5. The Working Group noted with satisfaction the increasing number of States participating in its discussions, including States with plans and activities related to nuclear power source applications in outer space, and encouraged additional States to join the work of the Working Group.

6. The Working Group exchanged and discussed information relevant to the use of nuclear power source applications in outer space that had been provided by the United Kingdom of Great Britain and Northern Ireland, the European Space Agency and the International Atomic Energy Agency (IAEA). In that regard, the Working Group recalled that the focus of the Safety Framework for Nuclear Power Source Applications in Outer Space was on the protection of people and the environment in the Earth's biosphere from potential hazards associated with nuclear power source applications in outer space and discussed whether, given the developments in the space sector over the past decade, that protection might need to be extended to cislunar space and activities on the lunar surface.

7. The Working Group encouraged States members of the Committee and international intergovernmental organizations to provide responses to the questionnaire contained in the appendix to annex III to document A/AC.105/1338, as one of the methods for collecting the information necessary for its work and as a means of inviting more member States and international intergovernmental organizations to join the work of the Working Group and share their views, plans and experiences. The responses would be used in an anonymized and aggregated form to assist the Working Group in advancing its work for the period 2024–2028.

8. The Working Group recalled that a joint workshop with IAEA would be held a day ahead of the sixty-ninth session of the Committee, as a full-day workshop, co-chaired by the Chair of the Working Group and a representative of IAEA, as another method for exchanging views regarding the collection of information under the objectives of its workplan, in particular under objective 2 relating to potential future uses of nuclear power sources in outer space (A/80/20, paras. 119 and 120). The main objective of the workshop was for the Working Group to collect relevant technical information about potential future uses of nuclear power sources in outer space, including from governmental and non-governmental entities; it was underlined that the subsequent analysis would be carried out and eventual recommendations on potential new guidance made by the Working Group, in accordance with its workplan.

9. The Working Group requested the secretariat to facilitate the preparation of the joint workshop together with IAEA, noted with appreciation the preparatory work carried out by IAEA and agreed that a report on the workshop would be prepared and submitted to the Subcommittee at its sixty-fourth session, to be held in 2027.

10. The Working Group recalled that it had held two intersessional meetings, on 30 June and 1 July 2025, and on 13 November 2025, to advance its work, and agreed to hold additional intersessional meetings in 2026, as per its workplan.

11. The Working Group recalled the complementary nature of its work and technical expertise with the work of the Action Team on Lunar Activities Consultation and offered to address any questions the Action Team might have on matters pertaining to the use of nuclear power source applications related to lunar activities.

12. The Working Group noted the cross-cutting nature of the work of the Working Group on the Status and Application of the Five United Nations Treaties on Outer Space of the Legal Subcommittee, in particular its relevance to information-sharing under article XI of the Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies, and the implementation of principle 4 (“Safety assessment”) of the Principles Relevant to the Use of Nuclear Power Sources In Outer Space.

13. At its third meeting, on 11 February 2026, the Working Group adopted the present report.

Annex IV

Report of the Action Team on Lunar Activities Consultation

1. The Action Team on Lunar Activities Consultation had held five intersessional meetings, from September 2025 to January 2026, to identify, on the basis of the views expressed by the representatives of member States appointed to the Action Team, scientific and technical opportunities and challenges encountered or anticipated in previous, ongoing and planned lunar activities, with a view to starting the drafting of recommendations in accordance with its workplan (A/80/20, annex I), as endorsed by the Committee on the Peaceful Uses of Outer Space at its sixty-eighth session, in 2025.

2. The Action Team had heard presentations by the representatives of Canada, France, Germany, Japan, the Republic of Korea, the Russian Federation, the United Arab Emirates, the United Kingdom of Great Britain and Northern Ireland and the United States of America at the aforementioned intersessional meetings and on the margins of the sixty-third session of the Scientific and Technical Subcommittee. In their presentations, those representatives had identified a number of opportunities and challenges, as mentioned above, in relation to lunar activities.

3. With regard to the aforementioned opportunities and challenges, the Action Team had also invited and, to date, had received written contributions from States members of the Committee, namely Armenia, Brazil, Ecuador, France, Germany, India, Japan, Jordan, Poland and the Russian Federation, as well as organizations having permanent observer status with the Committee, and relevant United Nations entities, in which such opportunities and challenges were identified.

4. The Action Team had discussed the value of best practices to promote safe, sustainable and transparent lunar activities.

5. The Action Team had discussed the need for greater transparency in the dissemination of information relating to lunar exploration activities and plans, including the relevant international consultations regarding, inter alia, programmes, missions, scientific research and information on the lunar environment.

6. The Action Team noted that participation in its work was open to representatives appointed by States members of the Committee.

7. The Action Team noted that its liaison and coordination efforts within the framework of the Committee aimed at exchanging information, avoiding duplication of work and drawing on available expertise would continue, including on an ad hoc basis, in accordance with the Action Team's mandate (A/79/20, annex IV).

8. The Action Team noted that it could also, as necessary, invite organizations having permanent observer status with the Committee, recognized technical, scientific, policy and legal experts and any other entities whose written submissions were deemed useful for its work to participate, in accordance with the Action Team's mandate.

9. The Action Team noted that it would hold meetings both on the margins of the sessions of the Legal Subcommittee and the Committee and during the intersessional period in 2026 in order to advance its work in accordance with the workplan, and that it would report on the progress made in its work to the Legal Subcommittee and the Committee at their sessions to be held in 2026.
